

The Army Transport Association Inc (ATA) is an association for retired members of RAASC, RAE (TN), RACT as well as the current serving members of Royal Australian Transport CORPS (RACT).

We have meetings and luncheons for the members to re-connect as well as planned visits to current military establishments to meet with current serving RACT soldiers as well as keeping our ATA members up to date with the current vehicles and equipment being used by our CORPS.

Suggested changes-

Army Transport Association Inc (ATA) was formed in 1984 , to create a network of both retired and serving members to help through their transition to civilian live, keeping in contact with their own generation as well as passing their experiences onto current serving members creating a bond of friendship and mental wellbeing.

Members are made up of many CORPS, transport land and sea, mechanical engineers, and Air Dispatch to name a few.

We have members that serviced in excess on forty years, it's important to give these members exposure to the current military system by way of visits to military training areas and their partnering organisations.

We support and help them and the family throughout their dark times and foster that through regular gatherings and staging functions throughout the year, (ANZAC Day, Xmas luncheons, and the Corps Birthday).
